

Elective Course Guidelines

1. Types of Electives

Westbrook University degree programs include two categories of elective credits: (a) Restricted Electives — courses chosen from a defined list related to the student's major; and (b) Free Electives — any credit-bearing courses that fulfill remaining credit-hour requirements for graduation.

2. Minimum Requirements

All undergraduate degree programs require a minimum of 120 credit hours for graduation. Typically, 30–45 credit hours are designated as free or restricted electives, depending on the major. Students are encouraged to use elective credits to pursue a minor, certificate, or areas of personal interest.

3. Choosing Electives Strategically

Students are advised to use elective slots for courses that complement career goals, fulfill minor requirements, or enable double-major completion. Academic advisors can assist with multi-semester elective planning. Elective courses outside the major may fulfill Core Curriculum requirements if properly designated.

4. Restrictions

- No more than 30 credit hours from a single department may count toward free elective credit
- Remedial or developmental courses (below 100-level) do not count toward graduation credit
- Courses in which a student has received an F may be repeated but both grades count in GPA
- Courses audited (AU) do not count toward credit totals
