Incomplete Grade Policy

1. Definition

An Incomplete (I) grade is a temporary grade assigned when a student has completed the majority of coursework (at least 70%) with a passing grade, but has been prevented from completing remaining requirements due to documented extraordinary circumstances beyond the student's control.

An Incomplete is not appropriate for students who simply did not complete work or fell behind due to poor time management.

2. Eligibility Requirements

- Student has completed at least 70% of course assignments and assessments
- Student is passing the course based on work completed to date
- Extraordinary circumstances (illness, family crisis, etc.) prevented completion of remaining work
- Documentation of circumstances is available and verifiable

3. Requesting an Incomplete Grade

Students must submit an Incomplete Grade Request to the instructor before the last day of classes. The instructor and student jointly complete the Incomplete Grade Contract (Form AA-12), specifying the remaining work, the completion deadline, and the grade that will be assigned if the work is not completed.

Instructors are not obligated to grant an Incomplete and may decline if course circumstances do not permit it.

4. Completion Deadline

All incomplete work must be submitted to the instructor within 60 calendar days of the first day of the following regular semester (fall or spring). For spring Incompletes, the deadline falls during the summer.

If the remaining work is not submitted by the deadline, the Incomplete grade is automatically converted to the grade specified in the Incomplete Grade Contract (typically an F or the grade earned on completed work only).

5. Impact on Academic Standing

Incomplete grades are not calculated in the GPA until they are resolved. Students with outstanding Incomplete grades are not eligible for the Dean's List or Honors designations. More than two unresolved Incomplete grades in a single semester may trigger a review by the Academic Standards

Committee.
