Effective: August 1, 2024

Revision: 1.0

Online Examination Policy

1. Scope

This policy applies to all examinations delivered through the university's Learning Management System (LMS) or other approved digital platforms, whether for online, hybrid, or face-to-face courses.

2. Technical Standards

Online exams must be built and administered using the university's approved LMS. Instructors must test all exam settings, including time limits, question randomization, and attempt limits, at least one week before the exam is administered. A test quiz must be available to students to verify browser compatibility.

3. Technical Difficulties

Students who experience a technical failure (internet outage, browser crash, LMS error) during an online exam must contact the IT Help Desk immediately and document the issue with a screenshot or error message. Students must also notify their instructor within 30 minutes of the disruption.

If the technical issue is verified by IT, the student will be provided with a rescheduled exam. Technical issues caused by student negligence (e.g., outdated browser, known outage in student's area) do not automatically qualify for a makeup.

4. Academic Integrity in Online Exams

All online exams are subject to the Academic Integrity Policy (ACAD-INT-001). Students may not use unauthorized resources, share questions with other students, or use any form of electronic assistance unless explicitly authorized. Suspected violations detected through LMS logs or proctoring tools will be referred to the Academic Integrity Office.
